9th Technology Conference & Exhibition
Sharing best practices in

- Safety
- Health &
- Environmental Protection

1-3 April 2014
Madrid—Spain
Euro Chlor is pleased to invite you to participate in its 9th International Chlorine Technology Conference and Exhibition which will take place in Madrid, the beautiful capital of Spain, on April 1-3, 2014.

The conference will be held at the Melia Castilla hotel, close to the city centre, where accommodation is available at a special rate for participants.

Again this time we expect more than 300 participants from Europe but also from other regions of the world.

Based in Brussels, Euro Chlor works with national, European and international authorities to ensure that legislation affecting the industry is workable, efficient and effective.

Enjoy special participation rates by booking before January 31, 2014.

Euro Chlor provides a focal point for the chlor-alkali industry’s drive to achieve a sustainable future through economically and environmentally sound manufacture and use of its products.

With around 40 speakers, the conference provides a valuable forum sharing information to improve safety, health, environment protection performances of all in technical matter related to the aspects of production, transportation and use of chlorine.

Following the great success of the previous events, the first day of the conference will be dedicated to technology. This particular session will include presentations made by suppliers on state-of-the-art equipment and services to the chlor-alkali sector, including electrolysers, membranes, analysers, valves, gaskets ....

In parallel to the Conference, an exhibition featuring more than thirty engineering companies, consultancies and equipment manufacturers will give participants an opportunity to meet representatives from a wide range of suppliers and services to the chlor-alkali industry.
